Subject index

Adsorption
Adsorption of benzonitrile at the aqueous solution/gold (111) interface (Richer et al.) 339
Three-dimensional phase-sensitive ac voltammetry for the study of adsorption processes. An application to the adsorption of sodium dodecyl sulphate at the mercury–electrolytic solution interface (Papadopoulos et al.) 375
Aniline
Synthesis, characterization and electropolymerization of ferrocene monomers with aniline and phenol substituents (Horwitz et al.) 79
Anodic dissolution
On the oscillation characteristics of anodic copper dissolution (Fricoteaux et al.) 161
Aqueous media
Adsorption of benzonitrile at the aqueous solution/gold (111) interface (Richer et al.) 339
Azo compound
Difference between the electrochemical reductivities of *trans* and *cis* isomers of an azo compound in the assembled monolayer film (Liu et al.) 259
Benzonitrile
Adsorption of benzonitrile at the aqueous solution/gold (111) interface (Richer et al.) 339
Bilirubin
Spectroelectrochemical study of bilirubin in dimethyl formamide (Dong et al.) 219
Butadiene derivatives
Reactivity of radical-anions and dianions derived from electrochemical reduction of tetraphenylbutatriene and 1,1,4,4-tetraphenyl-1,3-butadiene (Vincent, Peters) 93
Butatriene derivatives
Reactivity of radical-anions and dianions derived from electrochemical reduction of tetraphenylbutatriene and 1,1,4,4-tetraphenyl-1,3-butadiene (Vincent, Peters) 93
Capacitors
A model to characterize the impedance of electrochemical capacitors arising from reactions of the type $O_{ad} + n\,e^- \rightleftharpoons R_{ad}$ (Tilak et al.) 405
Carbon
Microstructural and morphological changes induced in glassy carbon electrodes by laser irradiation (Pontikos, McCreery) 229
Carbon dioxide
Photoelectrochemical reduction of carbon dioxide on a p^+/p-Si photocathode in aqueous electrolyte (Junfu, Baozhu) 191
Carbon surface structure
Surface structural and electrochemical investigations of pyrolytic carbon film electrodes prepared by chemical vapour deposition using ethene as carbon source (Eriksson et al.) 291
Cefazolin–Triton X-100 system
Inhibition of the electrode reduction of an adsorbed species by the competitive adsorption of a surfactant. Study of the cefazolin–Triton X-100 system at the Hg–H_2O interface (Muñoz et al.) 359
Charge transfer
Study by cyclic voltammetry of a reversible surface charge transfer reaction when the reactant diffuses to the electrode (Garrido et al.) 19
Chronoamperometry
Two-component diffusion with reaction in chronoamperometry. Approach to equilibrium conditions in the diffusion layer (Evans) 387
Coordination compounds
The effects of tetraphenylporphyrin and its metal coordination compounds on H^+ ion

transfer across the water/nitrobenzene interface (Xia et al.) 59

Copper
On the oscillation characteristics of anodic copper dissolution (Fricoteaux et al.) 161

Cubic schemes
Electrochemical reactions with protonations at equilibrium. Part 14. The cubic scheme (Laviron, Meunier-Prest) 1

Current
A simple method for evaluating the current in the cyclic voltammogram for reversible systems (Suzuki et al.) 397

Cyclic voltammetry
Study by cyclic voltammetry of a reversible surface charge transfer reaction when the reactant diffuses to the electrode (Garrido et al.) 19
New concept for a potentiostat for on-line ohmic drop compensation in cyclic voltammetry above 300 kV s^{-1} (Amatore, Lefrou) 33
Voltammetric study of protonated 1,10-phenanthroline cation transfer across the water/nitrobenzene interface (Doe et al.) 69
Oxygen reduced species in molten $Li_2CO_3 + K_2CO_3$ (42.7+57.3 mol%) at 650°C. A thermodynamic, voltammetric and convolution potential sweep characterization (Moutiers et al.) 175
Electrochemical generation of highly reduced oligoanthrylene systems — a voltammetric study (Mortensen et al.) 201
Poly(pyrrole-metallotetraphenylporphyrin)-modified electrodes Part 2 (Deronzier et al.) 325
A simple method for evaluating the current in the cyclic voltammogram for reversible systems (Suzuki et al.) 397

Diffusion
Study by cyclic voltammetry of a reversible surface charge transfer reaction when the reactant diffuses to the electrode (Garrido et al.) 19
Two-component diffusion with reaction in chronoamperometry. Approach to equilibrium conditions in the diffusion layer (Evans) 387

Dihydropyridines
Monoelectronic reduction of 1-alkyl-3,5-di(alkylcarbamoyl) pyridinium ions as a model of the NAD^+/NADH system. Obtaining 1,4-dihydropyridines (Leprêtre et al.) 115

Edge-plane graphite electrode
Promotion of the electrochemical response of some negatively charged proteins at an edge-plane graphite electrode by various redox inert cations: an electrochemical manifestation of Frumkin adsorption (Datta et al.) 307

Electrochemical capacitors
A model to characterize the impedance of electrochemical capacitors arising from reactions of the type $O_{ad} + n\,e^- \rightleftharpoons R_{ad}$ (Tilak et al.) 405

Electrochemical reductivity
Difference between the electrochemical reductivities of *trans* and *cis* isomers of an azo compound in the assembled monolayer film (Liu et al.) 259

Electrodes
Surface structural and electrochemical investigations of pyrolytic carbon film electrodes prepared by chemical vapour deposition using ethene as carbon source (Eriksson et al.) 291

Electropolymerization
Synthesis, characterization and electropolymerization of ferrocene monomers with aniline and phenol substituents (Horwitz et al.) 79

Equilibrium
Two-component diffusion with reaction in chronoamperometry. Approach to equilibrium conditions in the diffusion layer (Evans) 387

Ethene
Surface structural and electrochemical investigations of pyrolytic carbon film electrodes prepared by chemical vapour deposition using ethene as carbon source (Eriksson et al.) 291

Ferrocene monomers
Synthesis, characterization and electropolymerization of ferrocene monomers with aniline and phenol substituents (Horwitz et al.) 79

Frumkin adsorption
Promotion of the electrochemical response of some negatively charged proteins at an edge-plane graphite electrode by various redox inert cations: an electrochemical mani-

festation of Frumkin adsorption (Datta et al.) 307

Glassy carbon electrodes
Microstructural and morphological changes induced in glassy carbon electrodes by laser irradiation (Pontikos, McCreery) 229

Gold
Adsorption of benzonitrile at the aqueous solution/gold (111) interface (Richer et al.) 339

Impedance
A model to characterize the impedance of electrochemical capacitors arising from reactions of the type $O_{ad} + n\,e^- \rightleftharpoons R_{ad}$ (Tilak et al.) 405

Interfaces
Study of the voltammetric behaviour of josamycin across the water–nitrobenzene interface (Fan, Di) 107
Interfacial behaviour of semiconducting RuS_2 electrodes: a kinetic approach (Colell et al.) 127
Adsorption of benzonitrile at the aqueous solution/gold (111) interface (Richer et al.) 339

Ion exchange voltammetry
Electrochemical behaviour and preconcentration of uranyl(VI) at Nafion-coated glassy carbon electrodes (Ugo et al.) 145

Isomers
Difference between the electrochemical reductivities of *trans* and *cis* isomers of an azo compound in the assembled monolayer film (Liu et al.) 259

Josamycin
Study of the voltammetric behaviour of josamycin across the water–nitrobenzene interface (Fan, Di) 107

Kinetics
Interfacial behaviour of semiconducting RuS_2 electrodes: a kinetic approach (Colell et al.) 127

Laser irradiation
Microstructural and morphological changes induced in glassy carbon electrodes by laser irradiation (Pontikos, McCreery) 229

Lithium–potassium carbonates
Oxygen reduced species in molten $Li_2CO_3 + K_2CO_3$ (42.7+57.3 mol%) at 650°C. A thermodynamic, voltammetric and convolution potential sweep characterization (Moutiers et al.) 175

Mercury
Study of the electrochemical reduction of isonicotinic acid at a mercury electrode (Rodríguez-Amaro et al.) 269
Three-dimensional phase-sensitive ac voltammetry for the study of adsorption processes. An application to the adsorption of sodium dodecyl sulphate at the mercury–electrolytic solution interface (Papadopoulos et al.) 375

Microstructure
Microstructural and morphological changes induced in glassy carbon electrodes by laser irradiation (Pontikos, McCreery) 229

Molten salts
Oxygen reduced species in molten $Li_2CO_3 + K_2CO_3$ (42.7+57.3 mol%) at 650°C. A thermodynamic, voltammetric and convolution potential sweep characterization (Moutiers et al.) 175

Monolayer film
Difference between the electrochemical reductivities of *trans* and *cis* isomers of an azo compound in the assembled monolayer film (Liu et al.) 259

Morphology
Microstructural and morphological changes induced in glassy carbon electrodes by laser irradiation (Pontikos, McCreery) 229

Nafion-coated electrodes
Electrochemical behaviour and preconcentration of uranyl(VI) at Nafion-coated glassy carbon electrodes (Ugo et al.) 145

Negatively charged proteins
Promotion of the electrochemical response of some negatively charged proteins at an edge-plane graphite electrode by various redox inert cations: an electrochemical manifestation of Frumkin adsorption (Datta et al.) 307

Nicotinic acid
Study of the electrochemical reduction of isonicotinic acid at a mercury electrode (Rodríguez-Amaro et al.) 269

Ohmic drop compensation
New concept for a potentiostat for on-line ohmic drop compensation in cyclic voltammetry above 300 kV s^{-1} (Amatore, Lefrou) 33

Oligoanthrylene systems
Electrochemical generation of highly re-

duced oligoanthrylene systems — a voltammetric study (Mortensen et al.) 201
Oscillations
On the oscillation characteristics of anodic copper dissolution (Fricoteaux et al.) 161
Peroxide
Oxygen reduced species in molten $Li_2CO_3 + K_2CO_3$ (42.7 + 57.3 mol%) at 650°C. A thermodynamic, voltammetric and convolution potential sweep characterization (Moutiers et al.) 175
Phenanthroline
Voltammetric study of protonated 1,10-phenanthroline cation transfer across the water/nitrobenzene interface (Doe et al.) 69
Phenol
Synthesis, characterization and electropolymerization of ferrocene monomers with aniline and phenol substituents (Horwitz et al.) 79
Photoelectrochemical reduction
Photoelectrochemical reduction of carbon dioxide on a p^+/p-Si photocathode in aqueous electrolyte (Junfu, Baozhu) 191
Platinum on carbon electrode
In situ studies of a dispersed platinum on carbon electrode using X-ray absorption spectroscopy (Herron et al.) 243
Polypyrrole
Poly(pyrrole-metallotetraphenylporphyrin)-modified electrodes Part 2 (Deronzier et al.) 325
Porphyrin
Poly(pyrrole-metallotetraphenylporphyrin)-modified electrodes Part 2 (Deronzier et al.) 325
Potentiostat
New concept for a potentiostat for on-line ohmic drop compensation in cyclic voltammetry above 300 kV s^{-1} (Amatore, Lefrou) 33
Protonations
Electrochemical reactions with protonations at equilibrium. Part 14. The cubic scheme (Laviron, Meunier-Prest) 1
Pyridinium ions
Monoelectronic reduction of 1-alkyl-3,5-di(alkylcarbamoyl) pyridinium ions as a model of the NAD^+/NADH system. Obtaining 1,4-dihydropyridines (Leprêtre et al.) 115
Pyrolytic carbon
Surface structural and electrochemical investigations of pyrolytic carbon film electrodes prepared by chemical vapour deposition using ethene as carbon source (Eriksson et al.) 291
Radical anions
Reactivity of radical-anions and dianions derived from electrochemical reduction of tetraphenylbutatriene and 1,1,4,4-tetraphenyl-1,3-butadiene (Vincent, Peters) 93
Redox reactions
A model to characterize the impedance of electrochemical capacitors arising from reactions of the type $O_{ad} + n\,e^- \rightleftharpoons R_{ad}$ (Tilak et al.) 405
Reduction
Reactivity of radical-anions and dianions derived from electrochemical reduction of tetraphenylbutatriene and 1,1,4,4-tetraphenyl-1,3-butadiene (Vincent, Peters) 93
Study of the electrochemical reduction of isonicotinic acid at a mercury electrode (Rodríguez-Amaro et al.) 269
Reversible systems
A simple method for evaluating the current in the cyclic voltammogram for reversible systems (Suzuki et al.) 397
Ruthenium disulphide
Interfacial behaviour of semiconducting RuS_2 electrodes: a kinetic approach (Colell et al.) 127
Semiconductors
Interfacial behaviour of semiconducting RuS_2 electrodes: a kinetic approach (Colell et al.) 127
Silicon photocathode
Photoelectrochemical reduction of carbon dioxide on a p^+/p-Si photocathode in aqueous electrolyte (Junfu, Baozhu) 191
Sodium dodecyl sulphate
Three-dimensional phase-sensitive ac voltammetry for the study of adsorption processes. An application to the adsorption of sodium dodecyl sulphate at the mercury–electrolytic solution interface (Papadopoulos et al.) 375
Spectroelectrochemistry
Spectroelectrochemical study of bilirubin in dimethyl formamide (Dong et al.) 219
Surfactant
Inhibition of the electrode reduction of an

adsorbed species by the competitive adsorption of a surfactant. Study of the cefazolin–Triton X-100 system at the Hg–H_2O interface (Muñoz et al.) 359

Tetraphenylporphyrin

The effects of tetraphenylporphyrin and its metal coordination compounds on H^+ ion transfer across the water/nitrobenzene interface (Xia et al.) 59

Three-dimensional phase-sensitive ac voltammetry

Three-dimensional phase-sensitive ac voltammetry for the study of adsorption processes. An application to the adsorption of sodium dodecyl sulphate at the mercury–electrolytic solution interface (Papadopoulos et al.) 375

Two-component diffusion

Two-component diffusion with reaction in chronoamperometry. Approach to equilibrium conditions in the diffusion layer (Evans) 387

Uranium ions

Electrochemical behaviour and preconcentration of uranyl(VI) at Nafion-coated glassy carbon electrodes (Ugo et al.) 145

Vapour deposition

Surface structural and electrochemical investigations of pyrolytic carbon film electrodes prepared by chemical vapour deposition using ethene as carbon source (Eriksson et al.) 291

Voltammetry

Study of the voltammetric behaviour of josamycin across the water–nitrobenzene interface (Fan, Di) 107

Water–nitrobenzene

Study of the voltammetric behaviour of josamycin across the water–nitrobenzene interface (Fan, Di) 107

Water/nitrobenzene interface

The effects of tetraphenylporphyrin and its metal coordination compounds on H^+ ion transfer across the water/nitrobenzene interface (Xia et al.) 59

Voltammetric study of protonated 1,10-phenanthroline cation transfer across the water/nitrobenzene interface (Doe et al.) 69

X-ray absorption spectroscopy

In situ studies of a dispersed platinum on carbon electrode using X-ray absorption spectroscopy (Herron et al.) 243
